### Trace the Testing History of your Equipments on the Tribologik® Website

You're about to change a piece of equipment and you want to assess its past performance before purchasing a new one? Your oil supplier's competitor is claiming that his lubricants last much longer than the one you've been using for years? You need statistics on the condition of your equipment in order to adjust your maintenance policies to your operational requirements?

You will find answers to these questions, and others, in the testing history of your equipment. The testing history covers all the tests that were made on your equipment since you first started to test it, going 5, 10 or more years back to the very beginning.

At Tribologik®, we're keeping track of the whole testing history of all your equipment and you can easily view it on our website at any time :

1. Go to [www.tribologik.com](http://www.tribologik.com)
2. Write down your **user name and password** in the login prompt
3. **Select you plant**
4. Click on the third tab from the left (**EQUIPMENT**)
5. Then click on **SAMPLE HISTORY** - the fourth subtitle from the left.

#	Name	Sequence #	Lab #	Report Date	Machine	Lubricant	Days since last sample
53	ENGINE 1	376	89979026	30 Jun 2012	NORMAL	NORMAL	3
61	ENGINE 2	202	87607502	14 Jun 2012	MARGINAL	MARGINAL	16
3	ENGINE 3	189	79399310	7 Mar 2012	NORMAL	NORMAL	91
65	ENGINE 4	147	67864324	20 Dec 2010	NORMAL	MARGINAL	553
371	ENGINE 5	89	62655431	31 Aug 2009	NORMAL	NORMAL	108
337	ENGINE 6	231	76756044	15 Jun 2012	MARGINAL	NORMAL	437
211	ENGINE 7	117	59221959	18 Jul 2011	NORMAL	NORMAL	341

On that web page you will be able to see at a glance the testing history of all your equipment, **including the diagnostic of both the lubricant and equipment**. Should you wish to go into details, you will be able to view the entire sample report as published.

At Tribologik®, we are fully aware that traceability is critical to optimal performance of your mobile and industrial equipment. Each test is fully traceable within the Tribologik® system with the ID number and name of the equipment, the sequence number, laboratory number, date of the report and the number of times the equipment has been tested, down to the very first test.
